PREPARING YOUR AD FILE FOR PRINT

Please follow the guidelines below when creating your ad

SIZE & BLEED:

Non-Bleed Ad: Must be supplied with a border all around the ad.

Bleed Ad: Build ad to trim size plus 1/4" bleed allowance beyond trim on all sides. Trim allowance will be trimmed off allowing the ad to run to the edge of the magazine. Keep all important contents (texts/logos) within the live area (1/4" away from the trim edge). Please supply file with crop marks at trim size. **See Bleed Ad Guides for assistance.**

IMAGE RESOLUTION:

- » Resolution of images should be 300 ppi or higher for good print quality.
- » Low resolution images will result in blurry and pixelated images.

COLOUR MODE & COLOUR SPACE:

- » **Colour Ad:** All images, graphics and texts must be in CMYK only. Convert all RGB (for web use only) or spot/pantone (PMS) colours to CMYK.

ACCEPTABLE FILE FORMATS:

- » High resolution PDF with crop marks and all fonts embedded/outlined.

TIP When exporting/saving to PDF, select the **Adobe PDF Preset [PDF/X-1a:2001]**. It prepares the file to commercial print standards.
